Ibrahim Araji

Ontario, Canada | +961 78 969 318 | araji-ibrahim@outlook.com | LinkedIn: ibrahim-araji | GitHub: Ina-06

Profile

Full-stack engineer with hands-on experience building production-grade, user-facing features using React and Next.js, alongside Python systems that automate real business workflows. Skilled at translating requirements into clean, reusable components, integrating REST APIs, and shipping reliable tools under tight deadlines. Strong foundation in data structures, algorithms, and concurrent programming.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive & Cross-Browser Design, Component Architecture
Backend & APIs: Python, Node.js (familiar), REST APIs, WhatsApp Business Cloud API, SQL
Languages: JavaScript/TypeScript, Python, Java, C, SQL
Tools: Git, GitHub, VS Code, Linux, Playwright, PyInstaller, Netlify
Computer Science: Data Structures, Algorithms, Multithreading & Concurrency, OOP, System Design

Experience

SwiftForce Logistics (SWFL) Remote (U.S. Based)
Dispatcher (Full-Time) → Automation Engineer Intern *Oct 2025 – Present*

- Started as a full-time dispatcher, coordinating real-time delivery routes, driver check-ins, and route completions as primary point of contact for on-road drivers.
- Promoted to Automation Engineer Intern to build automation tooling for the dispatch team at a larger scale, shipping two production Python systems used daily.
- Built **Cortex Automation**, a Playwright browser-automation suite tracking pre-trip vehicle inspections and driver data across a paginated internal logistics platform.
- Built **SWFLBot**, a WhatsApp Business Cloud API tool with a custom GUI automating real-time driver communications, packaged as a standalone Windows executable with a 150+ test suite.
- Cut manual dispatch workload by an estimated 75% through a two-stage preview-and-confirm send pipeline safeguarding bulk messaging accuracy.

MSII Marketing Science International Inc. London, Ontario
Freelance Web & Coding Assistant *Feb 2022 – May 2023*

- Built and edited HTML/CSS templates and assisted with JavaScript/Python feature development and bug fixes for client web projects, gaining hands-on Git and deployment experience.

Projects

Personal Portfolio — Interactive Comic-Book Portfolio Site ibrahimaraji.netlify.app
Next.js, React, Tailwind CSS, Resend, Netlify

- Designed and built an interactive single-page portfolio around a **scroll-driven 3D page-turn mechanic** and **hand-authored SVG sprite animation**, with a fully keyboard-accessible **reduced-motion fallback**.
- Implemented a **serverless contact endpoint** on Next.js API routes with server-side validation, honeypot spam filtering, and transactional email delivery via **Resend**.

UniTok — Social Platform for University Students unitok.app
Next.js, React, TypeScript, Python

- Built a Next.js/React frontend with a **reels-style scrollable feed** and discussion forums for campus life; integrated **Python backend services** and collaborated with a team via Git/GitHub for version control, code review, and deployment.

Connect Four AI — Multithreaded Game Engine github.com/Ina-06/Connect4KHI
C, Concurrency, Algorithms

- Built a **multithreaded** Connect Four engine in C, parallelizing game-tree search across concurrent worker threads and implementing **Minimax with Alpha-Beta pruning** for deep, real-time move evaluation; optimized memory management for high-performance tree traversal.

Education

American University of Beirut Beirut, Lebanon
Bachelor of Science in Computer Science *Sept 2023 – Expected Spring 2027*

- Dean's Honor List — Spring 2024–25, Spring 2025–26.

Additional Information

Languages: Fluent in Arabic, English, and French
Leadership: Experience leading teams and coordinating projects to deliver results.
